

AMENDMENTS TO THE CLAIMS:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1. (Currently Amended) A quote and order entry system comprising:

a quote interface module adapted to receive information from a quote information source, the quote interface module assembling the received information in an interactive user interface, wherein in the interactive user interface a first category of information is displayed together with ~~one or more~~ a first plurality of concentric bands each having a dimension determined based on ask size information and ~~one or more~~ a second plurality of concentric bands each having a dimension determined based on bid size information.

2. (Original) The system of claim 1, wherein the first category of information comprises one or more of a stock symbol, last price information, bid tick information, bid price information, price change for day information, ask price information, last size information, a split-buy button and a split-sell button.

3. (Currently Amended) The system of claim 1, wherein the ~~one or more bands of the first plurality representing ask size information and the bands of the second plurality one or more bands representing bid size information~~ are dynamic and are capable of being resized based on liquidity.

4. (Currently Amended) The system of claim 1, wherein the ~~one or more bands of~~  
~~the first plurality representing ask size information and the one or more bands of the second~~  
~~plurality representing bid size information~~ are selectable.

5. (Currently Amended) The system of claim 4, wherein upon selection of one of a  
~~band of the one or more bands representing ask size information and the one or more bands~~  
~~representing bid size information~~ first plurality and a band of the second plurality, an order  
module assembles an order based on section information and information associated with the  
selected band.

6. (Original) The system of claim 5, wherein the information associated with the  
selected band comprises price point information.

7. (Original) The system of claim 5, wherein the selected band further includes  
market participant information including at least one of market-maker identifiers, exchange  
identifiers and Electronic Communication Network identifiers.

8. (Currently Amended) The system of claim 1, wherein the ~~one or more bands of~~  
~~the first plurality representing ask size information and the one or more bands of the second~~  
~~plurality representing bid size information~~ are resizable based on at least one of linear  
proportions, logarithmic proportions, linear resizable proportions and scale to fit.

9. (Currently Amended) The system of claim 1, further comprising a stop button that freezes the ~~one or more bands of the first plurality representing ask size information and the one or more bands of the second plurality representing bid size information.~~

10. (Currently Amended) The system of claim 1, wherein the ~~one or more bands of the first plurality representing ask size information and the one or more bands of the second plurality representing bid size information~~ are user configurable such that at least one of color, size, font, refresh rate, minimum band width, maximum band width and proportionalities can be selected.

11. (Original) The system of claim 1, further comprising a summary module adapted to display at least one of summary information and order information.

12. (Original) The system of claim 1, further comprising an order module that is capable of assembling and displaying one or more of an order preview interface and an order confirmation interface.

13. (Original) The system of claim 12, wherein an order preview interface and an order confirmation interface are capable of being disabled to allow one-click transactions.

Claims 14-36 (Cancelled).

37. (New) The system of claim 1, wherein the first plurality of bands and the second plurality of bands are disposed to opposite sides of a common center so as to be opposed to each other.

38. (New) The system of claim 1, wherein the bands of the first plurality have respective widths that vary based on ask size information, and the bands of the second plurality have respective widths that vary based on bid size information.

39. (New) The system of claim 1, wherein each band of the first plurality has a color different from that of any adjacent band of the first plurality, and wherein each band of the second plurality has a color different from that of any adjacent band of the second plurality

40. (New) The system of claim 1, wherein the bands of the first plurality and the bands of the second plurality are arc-shaped.
